

Redaction evidence — visible text

The code below is visible ordinary text and must be removed by a real redaction.

ZXQ-PHI-9173

The remaining public record text is a stability canary.

Redaction evidence — white selectable text

The white-on-white canary remains selectable even though it is not visibly rendered.

This page should remain visually stable after removing its invisible term.

Redaction evidence — scanned image

SCANNED INTAKE IMAGE
ZXQ-PHI-9173
Image-only canary for bou

The image pixels and the invisible OCR layer carry the same bounded canary.

Redaction evidence — non-page channels

Attachment, metadata, XMP, annotation, hidden widget, orphan object, and prior revision carry the canary.

None of those channels should become visible in the public copy.
